

*The lone female executive is no longer a curiosity. We live in an age where women are travelling almost as much as men.*

*Whether travelling for business purposes or any other, the proportion of women travellers is quite a sizeable one. Research has shown that over 40 per cent of business travellers are women.*

*Recognising the importance of our lone female guests, the Red Cow Moran Hotel endeavours as much as possible to proactively anticipate their needs through its **Lady Executive Program**;*
